

SUNDA Doc

Sunda Doc translates documents from English to Finnish or from Finnish to English in your text editor. It's a valuable tool whenever you quickly need to get an overview of a document and you do not have sufficient knowledge of the language. In addition, you can use the application to create rough translations of documents. Human translator may then polish the text.

Sunda Doc works as a toolbar inside the MS Word and OpenOffice text editors. Just click a button in the toolbar to translate an entire document or a selected text fragment. The translation document preserves the original document layout. User dictionaries and translation memories can be used to improve the translation accuracy.

We offer Sunda Doc both as a service and as a stand-alone translator. In the service translations are performed on the Sunda Systems server. The service version also offers a web browser interface for translating documents. Sunda Doc Workstation product performs all translations locally a user's computer, which is suitable especially for enterprises.
