

# SUNDA Tool

Sunda Tool allows you to translate text and documents from English to Finnish or from Finnish to English. It is a particularly handy translation tool for professional use, but there are many recreational uses for it as well.

Sunda Tool works as a Windows application. You can write text to the translation window yourself or load it from a file. Using Copy & Paste you can bring text from other applications into Sunda Tool. The program retains the basic document formatting in translations. User dictionaries and translation memories can be used to improve the translation accuracy.

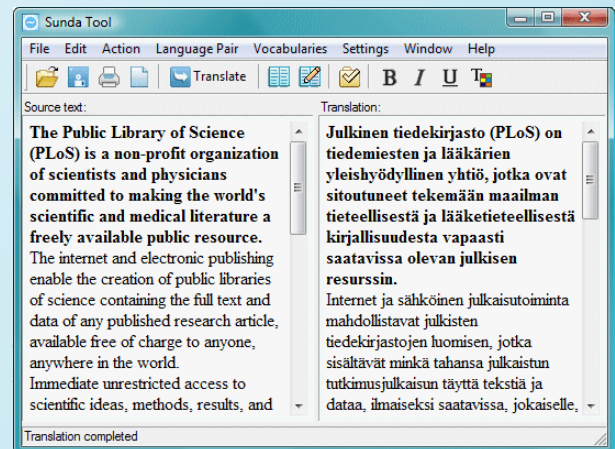

We offer Sunda Tool both as a service and as a stand-alone translator. In the service translations are performed on the Sunda Systems server. The service version also offers a web browser interface for translating text. Sunda Tool Workstation product performs all translations locally on a user's computer, which is suitable especially for enterprises.

## Main Features

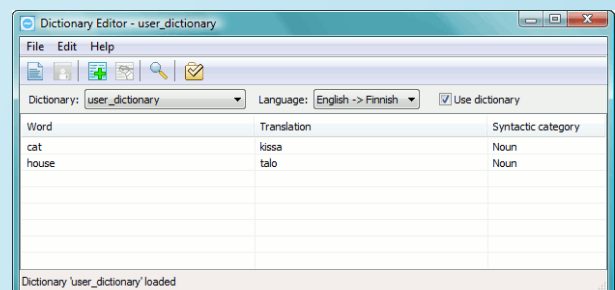

- Fast and easy to use. Translate text and documents with a single click.
- Works as a Windows application. You can also perform translations using a web browser interface.
- Supports translation of the following document types: RTF, Word, OpenDocument, PDF, PowerPoint, Excel
- The English-to-Finnish translator recognizes over 160,000 words and idioms. In addition, it uses 70,000 Intelligent Linguistic Rules to translate text into Finnish.
- The Finnish-to-English translator recognizes comprehensively Finnish words and their inflections. It contains over 100,000 linguistic rules.
- Includes ready-made special dictionaries such as Business and Information Technology.
- Improve translation accuracy with your own dictionaries and translation memories.
- SSL technology ensures secure data transfer between the client program and the translation server.
- Through the automatic update you always get the latest version of the translator.

**Operating system:** Windows 2000/XP/Vista/7.

The web browser interface of the translation service can be used also with Linux and Mac.
