

Sunda Web translates web pages from English to Finnish or from Finnish to English, while preserving the original page formatting. It is handy, for example, for people who wish to follow Finnish news or articles but are not used to reading in Finnish.

Sunda Web inserts a toolbar in your web browser. Just click a button in the toolbar and an entire web page or a selected text section appears instantaneously translated. The translator contains ready-made special dictionaries such as Business and Information Technology. In addition, you can customize the translator with your own dictionaries.

We offer Sunda Web as a service which performs the translations on the Sunda Systems translation server. Through the automatic update feature you always get the latest version of the translator and the client program.

If you wish to translate your personal documents, we recommend Sunda Tool and Sunda Doc products.

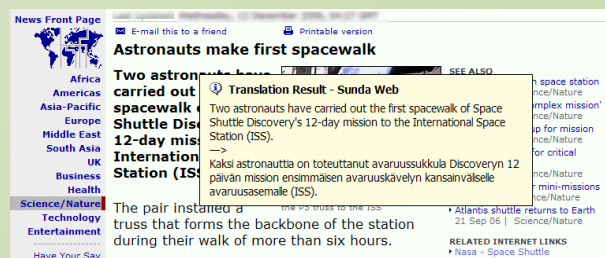

## Main Features

- Fast and easy to use. Translate web pages with a single click.
- Works with Internet Explorer and Mozilla Firefox.
- The translation page preserves the original page layout.
- The English-to-Finnish translator recognizes over 160,000 words and idioms. In addition, it uses 70,000 Intelligent Linguistic Rules to translate into Finnish.
- The Finnish-to-English translator recognizes comprehensively Finnish words and their inflections. It contains over 100,000 linguistic rules.
- Includes ready-made special dictionaries such as Business and Information Technology.
- Improve translation accuracy with your own dictionaries.

**Operating system:** Windows 2000/XP/Vista/7, Mac, Linux
